It did look promising, but it was so bad I had to make a refund for this. It's cool with english in a russian accent, but the voice actors are so bad. The game itself and its mechanics consists of purely bad quality.. I got this in a humble bundle and it is a very interesting game but it is a little dull for my likings. This game is fun for a little while and I can see where most people would like it but it's just not for me.. *Frequent Flier: A Long Distance Love Story* is a short yuri (girl x girl) romance visual novel by NewWestGames, the same developers of *Ecchi Sketch: Draw Cute Girls Every Day!* and *Sweet Volley High*. *Frequent Flier* tells the story of Emi, an American girl that's spending her vacation in Scotland. She soon meets a Scottish girl called Isobel, and they both fall in love and start making plans for their future. Everything seems fine at first, but then Isobel starts acting very weird...

The game was based on a true story, according to the developers. It starts cute, but Emi and Isobel's relationship gets unhealthy after a while. As soon as Isobel tells her "first visible lie" to Emi, I knew there was something wrong, and that this story probably wouldn't have a happy ending. Anyway, the writing here felt basic to me; it wasn't terrible, but it wasn't that good either. It was readable. I grew curious to know which lies would Isobel tell next, and how Emi would react to them.

The art style is very basic together with the coloring, but that didn't bother me so much. Some CGs were pretty (like Emi in the bathtub), but most of them (especially the erotic ones) weren't so good. BGM was alright, somewhat likable. About the voice acting, like it says on the description page, is only partial: just Isobel and James (Emi's best friend) are voiced. The VA was acceptable in my opinion. Also, it took me 2 hours to reach all endings, including the "hidden one".

4.5\10. I recommend getting this visual novel on a generous sale or a bundle and if you don't care about amateur art. It can be a good choice if you're in the mood to read something quick. There's also a free R18 patch which adds additional scenes to the game. You can find it on the developer's website.. \u624b\u6b8b. Cool DLC if you want to play some hours of this game.. The original pako car chase simulator is good, and now pako 2 is here.

if anyone hates this game, just wait it's in early access so just be patient until it's finished.. fun little smashing game. its not exactly boom blox bash party, but its a fun little stress reliever.. A great spin on the hidden object games. Most of the gameplay time consists of quite the opposite of pixel-hunting. Everything becomes clickable and it is your task to find something click-worthy (resellable). It is quite relaxing, as the experience is much less streamlined and you have more than one way to overcome a bunch of different and diverse challenges that the game presents you with.

Less tediousness, more fun to play. Recommended!

This is pretty awesome. The first time I've seen this type of movement with VR used. Almost fell over a couple of times. Amazing!. What should I say, instead of working on the game's stability, they release some useless cars. Of course, the Viper is really stingy and an improvement to the old one, but seriously, what I need at the moment is not a new car, but a game which doesn't crash or loses connection after a 1.5h race!. First impressions: Lots of fun so far, plays great with touch or Xbox controller. Looks really cool, awesome cartoony visual style. Looking forward to unlocking more vehicles!. It is a very limited and somewhat flawed game, but it is a fairly cheap and fun handball experience, so I do recommend (especially if it's on sale).. A relatively easy free achievement game for people with fast typing speeds. Took me a little over an hour and my friend and I got a few laughs out of some of the horrendous memes on here. It's one of those "So bad it's good" types of games, and I think that they executed the theme pretty well.. the absolute greatest game ive ever played. This game could be good, if only:

- * Had a moderation team that did not target non G-rated content
- * Allow for age-locked rooms, to prevent children from joining and to allow adults to be adults
- * Allow for password-protected rooms to play with your friends

The number of times I've seen moderators ban people for next to nothing is likely going to prevent this game from actually becoming successful. It's unfortunate because the formula they have is actually pretty good.

UPDATE: Shortly after the posting of this review, I found myself IP-banned from the game. Cannot even access their website. The VRChat video of the banning also was "banned" from their community page.

TLDR of the video: Someone else's actions resulted in a mass-banning of the entire world. This is not the way to generate a fanbase.
