The Wnt pathway is a major inducer of oncogenesis in breast cancer and, because of

CinderIO as a storage backend for OpenStack, the most convenient way to get started is by using CinderIO as the default backend. 1. Install OpenStack on your system. 2. Create a volume group that you want to use as your storage 3. Create a Cinder disk that uses this group 4. Install CinderIO Run the command below to install CinderIO on your system. \$ sudo apt-get install -y cinderio cinder NOTE: The version you want to install is the one in the suite [BOTH]. 5. Now that you have CinderIO installed, you need to configure it to talk to your OpenStack instance (`nova-api`). You do this by running the following command on your OpenStack instance: \$ sudo cinder-api -c cinder-compute.yaml This will download a new Cinder configuration. Once it has finished, it will load the appropriate configuration files. You can test that it is working by listing available volume groups in your system by issuing the command: \$ sudo cinder -v For more information on using CinderIO see the [CinderIO Docs](=== A second method You can also install the version of CinderIO that lives in the OpenStack suite, the CinderIO suite. 1. Install the suite. (You can choose your specific version in the installation process.) 2. Create a volume group that you want to use as your storage 3. Create a Cinder disk that uses this
